SUMMARY

I am an MCA (AI & ML) student with an interest in Android and web development. I enjoy building simple and useful applications and I am continuously working to improve my development skill. I am open to learning new tools and technologies that can help me contribute effectively in a professional environment.

TECHNICAL SKILLS

- Python
- Django
- Kotlin
- Postgresql
- C#
- MongoDB
- HTML
- Javascript
- C++
- CSS
- Git&Github
- AWS
- PHP
- MySql
- C
- Java
- Docker
- Android Studio

EXPERIENCE

Data Annotation Intern — Sahana System Limited [Nov 2025 - Feb 2026]

[certificate](#)

- Worked on data labeling and annotation tasks for a government-related web project, maintaining high accuracy and attention to detail while contributing to ongoing projects.

PROJECTS

InvoicePro — Multi-Tenant GST Invoice Generator SaaS

[Website](#)

- Developed and deployed a multi-tenant GST Invoice Generator SaaS web application using Django with features like invoice generation, customer/product management, CGST/SGST/IGST tax logic, dashboards, and demo user access. Built the platform using free-tier deployment and database services while supporting multiple companies on a single system. Improved skills in backend development, database management, SaaS architecture, deployment, and real-world business workflow implementation.

NewsHub — News Aggregator Website

[Website](#)

- A dynamic news website built using Python (Django) that fetches and displays live news articles using the NewsAPI. It includes features like user registration, login, category-based news browsing, and search functionality. The project is fully deployed online using Render, showcasing skills in web development, API integration, and deployment.

PixShrink — Image & pdf compressor app

[Playstore](#)

- Developed and published PixShrink, an Android application that enables efficient image and PDF compression with seamless file sharing. Built with a strong focus on privacy, the app works completely offline, contains no ads, and ensures user data is never stored. Successfully deployed on the Google Play Store as a fully functional, user-centric utility app.

YourNotes — Android notes app

[GitHub](#)

- Developed a notes app using Kotlin with features like add, edit, delete, and view notes. Implemented reminders, multiple themes, pinning, and text-to-speech. Used Room for local storage and Material Design components for a smooth user experience.

NewsHub — Real-Time news android app

[GitHub](#)

- Developed NewsHub, an Android news aggregator app that fetches real-time news using Retrofit and displays it in a user-friendly RecyclerView interface. Implemented features like swipe-to-refresh, efficient API integration, and seamless data presentation for an engaging user experience.

EDUCATION

2025 - 2027 (Pursuing) Parul University	Masters of Computer Applications (MCA Online) - Artificial Intelligence & Machine Learning
2025 Som-Lalit Institute of Computer Applications	Bachelor of Computer Applications (BCA) 7.55 CGPA
2022 Sahajanand Vidhyalay	HSC 87.14 %
2020 Sahajanand Vidhyalay	SSC 72.00 %

LANGUAGE

- Hindi
- English
- Gujarati

HOBBIES

- Typing
- Badminton
- Puzzle solving

PERSONAL DETAILS

- DOB : 1st June 2005
- Nationality : India
